ABOUT ME

I am a Graphic Designer and 3D designer specializing in creating models for video games. At the same time, I deal with film videos and web design, providing complete solutions for demanding projects. My knowledge of computer hardware and software, combined with my broad partnerships, make me a trusted partner for any project in the field of technology and design.

EXPERIENCE

SDK Designer & Developer
2019 - Present

Building upon years of development on the Cfx.re framework, which has existed in various forms since 2014, FiveM is the original community-driven and source-available GTA V multi-player modification project.

Graphic Designer & Front-End Developer
2024 - 2025

At iArk Digital Agency every project is a challenge for a custom artist. Keeping the quality of our work at its best, we apply the real time web design strategy where the design of your website's artwork is done in real time.
